

Training for Animal Birth Control Program

Beneficiaries - Veterinarians, Para vets and animal handlers of implementing agencies conducting ABC/ARV programs for street dogs.

Eligibility-

Veterinarian: A veterinary practitioner registered with the Veterinary Council of India or State Veterinary Council.

Para vet: Any person holding a diploma in veterinary nursing assistance or equivalent qualification

Animal handlers: Any person employed with the implementing agency for the purpose of catching and releasing dogs and for the purpose of handling dogs at an ABC Centre.

A team of at least 1 Veterinarian, 1 Para vet and 2 animal handlers or multiples thereof must be enrolled for training by the implementing agency. In exceptional circumstances, a single veterinarian, Para vet or animal handler may be enrolled upon giving reasons in writing.

Where required, a program manager may also be included in the team to train specifically on aspects of administration/management of the ABC program.

Duration – 3 weeks

The Animal Birth Control program has several components. Standardised training on each of these components is crucial for implementing agencies across the country so that high through-put birth control surgeries for street dogs may be conducted and the impact of the program may be visible.

The training shall be strictly in accordance with the Revised Module and shall be conducted by experts authorised by the Animal Welfare Board of India and conducted at an ABC facility recognised by the Board.

The components covered in the course of such training shall include::

- A. Catching of street dogs and recording data with regard to location
- B. Tagging of dogs and recording data regarding each dog
- C. Segregation and quarantine of dogs at the ABC Centre
- D. Isolation & quarantine for sick dogs
- E. Surgical procedures for spaying/castration
- F. Maintenance of records
- G. Post operative care
- H. Release of dogs
- I. Conflict mitigation and complaint redressed
- J. Outreach and awareness

Resources:

Presentations, videos, discussions and practical sessions by expert veterinarians, animal handlers, in-clinic Para vets, community engagement managers, animal law professionals/lawyers and various experts in program management.
